Executive Summary

The Housing Land Monitoring Report is an annual report that shows housebuilding trends in the Borough, including data on completions and the supply of land for residential development. This report represents the position at 31st March 2023.

A total of 309 (net) dwellings were completed during the monitoring period. A total of 6,851 dwellings have now been completed since 2010, resulting in a surplus of 1,268 dwellings against the Core Strategy requirement, taking into account prior under-provision that existed at April 2010.

At 31st March 2023 2,217 (net) dwellings that have not yet been built (including those under construction) had planning permission and there was land available for a further 358 dwellings on land allocated for housing in the Local Plan without planning permission, equating to provision for 2,575 dwellings.

1. Introduction

- 1.1 This Housing Land Monitoring Report (HLMR) has been prepared by Chorley Council to show housebuilding trends in the Borough, including data on completions and the supply of land for residential development. The HLMR is produced annually and covers the financial year that it follows. This HLMR reports on housing completions for the period 1st April 2022 to 31st March 2023 and the housing land supply position at 31st March 2023.
- 1.2 This HLMR provides an account of:
- The number and location of dwellings that have been completed during the monitoring period.
 - Progress towards the Central Lancashire Core Strategy housing requirement.
 - The number and location of dwellings that had planning permission as of 31st March 2023.
 - The status of housing land allocations covered in policy HS1 of the Local Plan 2012-2026.
 - Dwelling completions in terms of greenfield/brownfield status, windfall/allocated status, house types and bedroom numbers.

2. Annual Housing Completions and Requirements Until 2026

- 2.1 A net total of 309 dwelling completions were recorded during the monitoring year.
- 2.2 Policy 4 of the Central Lancashire Core Strategy sets out a minimum housing requirement for the Borough for the period 2010 – 2026 of 417 dwellings per year. This gives a total of 6,672 dwellings required over the plan period. At April 2010 Chorley had prior under-provision of 162 dwellings, which, in accordance with the Core Strategy, also needs to be made up over the plan period. Therefore, at April 2010 the housing requirement for the Borough was 6,834 dwellings.
- 2.3 Table 1 shows annual housing completions in Chorley since 2010.

Table 1: Annual Dwelling Completions (Net), 2010 - 2023

3. Housing Land Availability and Completions by Settlement

Availability

3.1 Table 3 shows housing land supply at 31st March 2023 by settlement.

Table 3: Housing Land Availability (at March 31st 2023) by Settlement

3.2 On 31st March 2023 there were 2,217 dwellings (net) with planning permission available to be built across the borough. Of these 322 were under construction. There were an additional 358 dwellings allocated for housing, but without planning permission, in the Local Plan 2012 – 2026.

3.3 Chorley Town accounts for almost half of the total housing land availability. Buckshaw Village and the Urban Local Service Centres of Adlington, Clayton-le-Woods, Clayton Brook/Green, Coppull, Euxton and Whittle-le-Woods make up the majority of the remaining availability. Approximately 20.5% of housing land availability is in rural areas including the Rural Local Service Centres of Eccleston and Withnell/Brinscall.

Completions

3.4 Table 4 shows the number of housing completions in each settlement since 2010. In accordance with Policy 1 of the Central Lancashire Core Strategy, most housing has been developed in Chorley Town and Buckshaw Village over the plan period with over 3,800 houses completed in these settlements combined. A significant amount of housing has also been developed in the Urban Local Service Centres of Adlington, Clayton-le-Woods, Clayton Brook/Green, Coppull, Euxton and Whittle-le-Woods, over 2,200 in total. There has been a smaller number of housing completions in the rural areas of the borough over the plan period.

3.5 Table 5 sets out the proportion of housing completions in each settlement over the period April 2010 – March 2023. Over the plan period Buckshaw Village and Chorley have had the highest proportion of completions with together over half all completions in the borough.

3.6 Over the monitoring year there was a significant increase in the proportion of completions in Chorley. This is due to completion of an apartment block of 62 dwellings and another major site of 33 dwellings. There was a decrease in the proportion of completions in Buckshaw Village during this period with completions here mainly being on one parcel within the Group 1 allocated site.

4. Progress of Local Plan 2012-2026 Allocated Housing Sites

- 4.1 Table 6 shows each allocated housing site within the Local Plan 2012-2026 along with the level of development and availability on each site at 31st March 2023.
- 4.2 4,461 dwellings have been completed since April 2012 on these sites. A total of 1,049 dwellings with planning permission (including those under construction) are available on the allocated sites, along with 358 dwellings allocated on land without planning permission.
- 4.3 It should be noted that the number of dwellings allocated in the Local Plan is based upon the number of units permitted/estimated on these sites at April 2012. It does not include completions on any of these sites that took place before this date. On some sites completion/availability figures have been revised upwards or downwards since April 2012, to reflect a change in dwelling numbers as a result of planning permissions granted.

5. Breakdown of Dwelling Completions

Brownfield/Greenfield Completions

- 5.1 The Central Lancashire Core Strategy sets a target of 70% of new housing to be built on brownfield land. The proportion of new dwellings developed on brownfield land met or exceeded this target up to March 2014. However, Table 7 shows that since then the target has not been met. One of the reasons for the large number of greenfield completions in recent years is the development of a number of allocated greenfield sites.

Table 7: Brownfield/Greenfield Completions (Gross)
